

String and Poly Tape Bundle Tyers

Economy is the word today. Poly Tape or String Twine are both far cheaper than plastic strapping. Replace expensive strapping with far less expensive Poly Tape, or Poly Cotton Twine and save thousands of dollars.

Use these machines to tie either bundles or individually rolled newspapers.

For the press room consider the **ATS** - a completely **automated tying station** for your in-line production. The ATS is a combination of any size Series 2000 Poly Tape or Twine Tyer along with two sections of Conveyor. The ATS is 100% customizable, so you can have a unit built to fit into your existing facility. The ATS will eliminate unnecessary handling with a photo electric sensor that detects approaching bundles and activates the tyer automatically. After the bundle is tied, it is discharged onto another conveyor moving away from the bundle tying production area.
